

## Project Information

MVM Co.  
North-Buda Gas turbine Cogeneration Power Plant  
Tender designing

# Project description

## Owner of the tender

MVM Co.

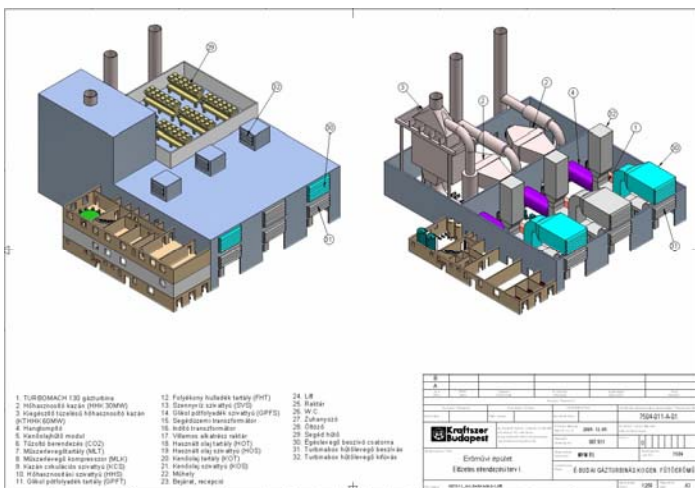

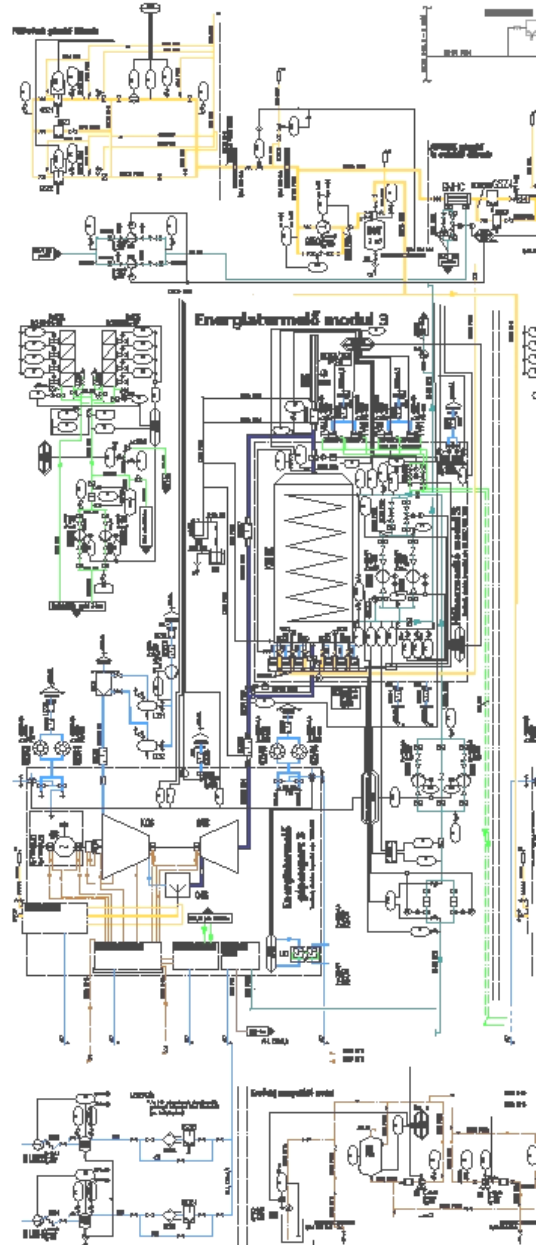

## The task

Tender designing and documentation of the gasturbine expansion established next to the extant North-Buda Power Plant.

## Scope of the designing

The main parts of the tender designing are the followings:

- P&I diagramm
- Heat-flow diagramm
- Layout
- Technical description
- Estimation of the project expenses
- Business plan
- Tender documentation

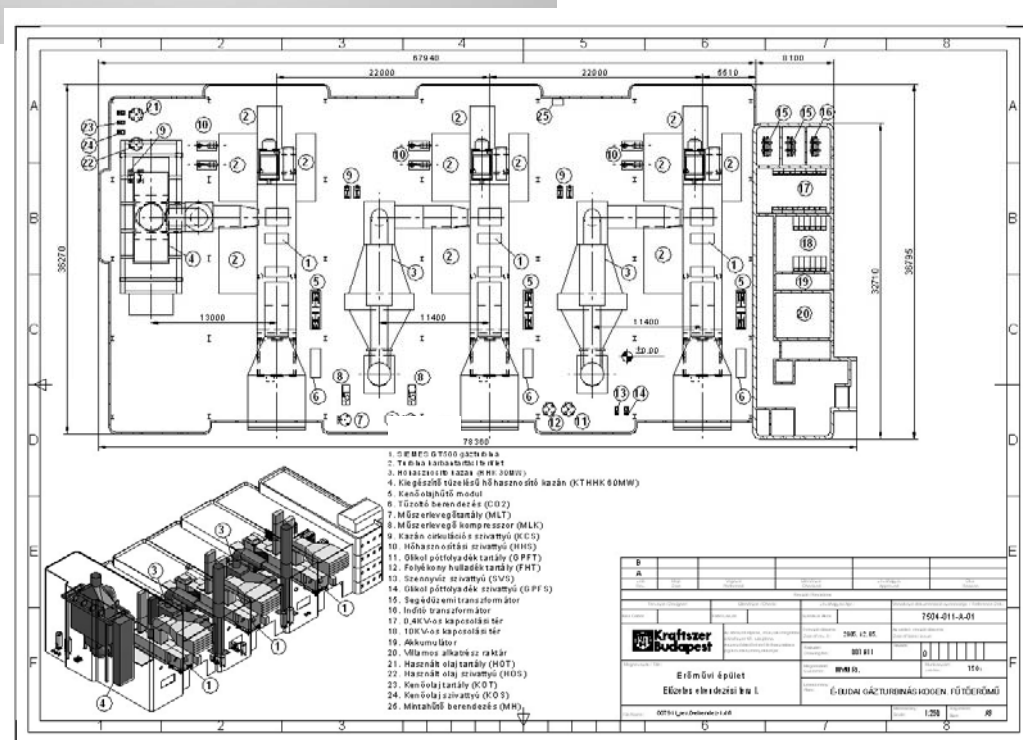

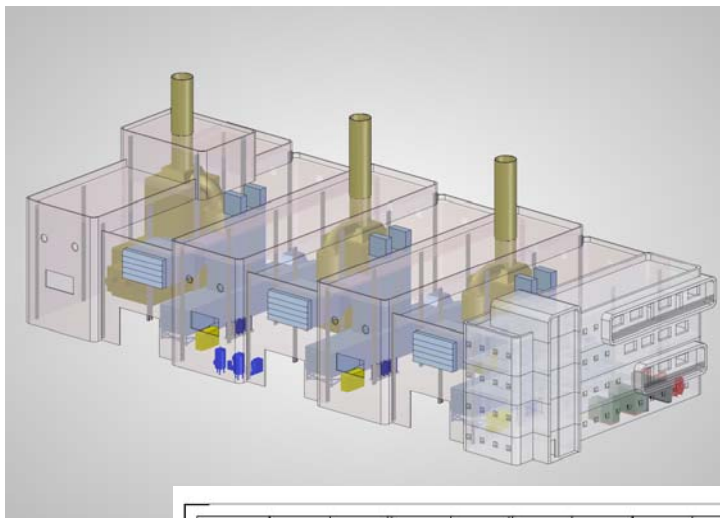

## Project description

### Designing content

The tender design of the gasturbine expansion prepared on the basis of more manufacturers, moreover we took into consideration more variations for certain manufacturers of gasturbine and heat-exchanger boiler.

We worked out the layout, the architecturer, control and electrical parts of the individual mechanical variations in the tender designing.

The requested variations, the technical details of the main equipments and all the technical and economic information, which specify the design technical content were documented according to the tender bid.
